Its operation is so simple as just by pushing a single switch to toggle brightness and modes. T1 comes with different power levels (white light only) and many colored lights, suitable for user's various needs.

Features

It's true that T1 is a lightweight flashlight, yet this one has got amazing features:
- Rechargeable built-in battery allows the light to be used for a very long time. So user don't have to throw the light away when battery is finished or look around to buy a new battery
- A single push button switch is placed, quite simple for users to play with, even young kids
- While easy to operate, that doesn't mean it is just a mini flashlight. It's more than that with many cool modes
